

## **Kommerling UK appoints Chemical Technologies Ltd (CTL) as UK distributor for the Cilbond range**

- **CTL to share stand 6C81 at automechanika, June 6-8th**

Kommerling UK has announced the appointment of Chemical Technologies Ltd (CTL) as a distributor for its Cilbond products in the UK. The product range includes high-performance primers and bonding agents, designed to chemically bond rubber and polyurethane elastomers during the moulding/casting processes to a variety of substrates including metals, plastics and fabrics.

Graham Hobbs, Technical Sales Manager for Kommerling explained more about the appointment; "Much of Cilbond's business is overseas and we were conscious that some of our UK customers were not getting the level of support they deserved. The CTL team have extensive knowledge and experience in this specialist market and are already delivering a high-quality service to organisations across the country."

"This appointment by Kommerling is a terrific opportunity for our company," said Andy Thomas, MD at CTL. "We have specialist storage facilities at our Cotswold headquarters which means we are able to hold good stock levels and meet the needs of our customers. The Cilbond range is widely recognised, and as well as handling Kommerling's existing UK business we hope to open up new opportunities."

For the first time, Kommerling is attending the automechanika exhibition, taking place at the NEC, June 6-8<sup>th</sup> and CTL will also be represented on their stand, number 6C81. "This is a new venture for Kommerling and will be a great chance to showcase the full product range and talk to visitors. The automotive manufacturing sector is often at the forefront in adopting new techniques and processes and we

believe that chemical bonding solutions are the way forward to meet some of challenges facing the industry,” said Graham Hobbs.

## **Background**

Coating Technologies Ltd, formerly C T Supplies Ltd, have been manufacturing and supplying coatings and coating support materials to the UK manufacturing industry since 1979. The combination of cleaning and metal preparation knowledge with the CILBOND bonding agents and coatings makes this a very good fit for the customer. The company also provides a range of complimentary products and services to this industry. For more information please visit [www.coating-technologies.com](http://www.coating-technologies.com)

Based in Preston, UK, CIL, now Kommerling UK is the UK's only developer and manufacturer of high performance rubber to metal, rubber to plastic, rubber to fabric and rubber to glass bonding agents for high performance automotive and industrial applications, including anti-vibration, hoses, belting and friction products. The company sells its products in over 50 countries through a network of distributors.

The Kommerling CILBOND range consists of:

- CILBOND Primers - high performance rubber to metal bonding primers, developed to five components exceptional in-service environmental protection.
- CILBOND Cover Coats - versatile solvent and water-based bonding agents for rubber-to-metal, rubber-to-fabric and PU to metal components.
- CILBOND One-Coats - pioneers of one-coat bonding technology, Kommerling CIK has a complete range of one-component products for all types of rubber and PU.

Koemmerling Chemische Fabrik GmbH is a leading international manufacturer of high-quality adhesives and sealants. Its European headquarters and extensive research and development facilities are in Pirmasens, Germany and it has a network of subsidiaries, sales offices and sales partners, in more than 80 different countries. With over 110 years' experience, the company has established itself as an innovative market leader in provision of Polysulfide, Polyurethane, Silicone and Polyisobutylene sealants for the automotive, insulating glass and photovoltaic industries. In April 2015, Royal Holdings, Inc. through its Kommerling UK Limited subsidiary, acquired CIL.

Koemmerling Chemische Fabrik has been awarded ISO 9001, ISO 14001 ISO 50001 and OHSAS 18001 certification.
